

# Choose D&T!

**Why opting for design and technology is fundamental to your future career in product design, digital design, engineering and textiles**

## What employers want

- A practical skill set that you can apply in your job
- Working in teams and alone
- Presentation and negotiating skills
- Experience and competence in complex problem solving

## A Level choices: Design and Technology

- Design Engineering
- Fashion and Textiles
- Product Design

**Choosing D&T GCSE is the route towards your specialism and career.**

If you have just one option and want a career in these sectors, make sure you choose design and technology. D&T is widely recognised as providing students with the transferable skills and critical thinking skills that are so important in many other areas of employment.
